

# YOUR GUIDE TO **GARAGE ORGANIZATION**

**GARAGE SOLUTIONS – TAILORED TO THE WAY YOU LIVE**

# YOUR GARAGE, REIMAGINED

It's time to dream outside the box. The garage used to be a place to park the car and store all your gear, but times have changed. Today, garages serve as an extension to the livable home, a retreat for a favorite hobby and a place to enjoy. Whether you need more storage space or you desire a full-blown man cave, we will work with you to transform your garage into a functional and stylish space that reflects your unique lifestyle. It's your garage, reimagined.

## THE PROCESS

**Consultation:** One of our expert design consultants will meet you at your home to discuss your needs and analyze your space. With a wide range of products including custom cabinetry, workbench counters, overhead racks and wall storage systems, your garage possesses endless design possibilities.

**Design:** Using the latest in 3-D design technology, our consultant will create a virtual version of your garage. The resulting rendering will enable you to see how your space will actually look and function, making it easy to apply changes and instantly compare the results.

**Estimate:** We will provide you with a free estimate for your preferred design. Based on your feedback, we may revisit the design process to accommodate any additional requests and budget requirements.

**Installation:** Our professional installers are dedicated to complete customer satisfaction. The installers will treat your home with care. Once installation is complete, all cabinets will be wiped down and the entire work area cleaned.

**Guarantee:** All cabinetry is guaranteed for life. If a product ever fails during normal use, we will replace it free of charge. Period.

## DESIGN & ORGANIZATION

# STANDARD FINISHES

Cabinet finishes and color can define your space. Whether you select a style that matches your in-home décor or makes a new statement, your design consultant can help you pick a look that is right for you. Finishes include metallic, wood grain, solid and powder coated.

**Metallic:** Floor to ceiling Windswept Bronze cabinets (shown left) with an inset workbench provide ample storage and make a statement. Metallic finishes are created using a durable thermofused melamine. Also available in Windswept Pewter and Brushed Silver.

**Wood Grain:** Maple wood grain finish cabinets (shown above) create a clean, modern feel and offer a smooth transition into your home. Also available in Coco, wood grain cabinets easily become a natural extension of your in-home décor.

Our ¾ inch thick cabinet construction is made using commercial grade, color matched materials. Choose from nine colors and four finishes or combine styles for a truly unique look.

**Solid:** White cabinets in a solid finish (shown below) provide a classic look. Solid finished cabinets are also available in Slate.

## POWDER COATED FINISHES

Innovative powder coated cabinets provide contemporary styling with high tech design. Available in Granite (above) and Red (below), powder coated cabinets are the most durable and environment resistant cabinets in the market today. Because the cabinets are completely encapsulated, they are moisture, stain and chip resistant and more durable than liquid paint or other alternatives.

# PRODUCT HIGHLIGHTS

**SMART DESIGN**

**Wall-Mounted Cabinets:** To protect your belongings from water, debris and pests, all of our cabinets are securely anchored directly to the garage wall to create a “floating” cabinet. This design also allows you to easily hose down or sweep your garage floor.

**Sliding Doors:** Innovative sliding door systems provide easy access to belongings without the need to move a parked vehicle. This dual sliding track door is particularly useful for spaces lacking adequate room for swinging doors.

# PRODUCT HIGHLIGHTS

**Cabinet Access:** Full-swing door hinges allow doors to open wide for easy access. Additionally, cabinets can be constructed without a center dividing post to provide unobstructed access to the entire shelf width and allow for storage of larger objects (shown below).

**Shelving:** One-inch fixed and adjustable Shelving is 25 percent thicker than the industry standard and has a load-bearing capacity of 100 pounds. Shelf spacing can easily change to accommodate all of your storage needs (shown above).

**Backing:** All garage cabinets are installed with full ¼ inch backing. Full backing strengthens the cabinets and eliminates gaps which could otherwise provide points of entry for dust and insects.

**Custom Sizing:** A wide variety of cabinet heights, depths and widths allows for endless design possibilities and customization (shown below). Extra deep cabinets have enough room to fit large storage bins front to back on a shelf, doubling the capacity of the competitors' cabinets.

**Hinges:** Cabinet doors come standard with 110 degree soft-close, concealed hinges (shown right).

**Drawers:** All drawers include full-extension runners for easy access to all of your stored items (shown lower right).

# COUNTERTOPS

Whether your passion is gardening or auto repair, woodworking or model planes, we will create a custom workbench perfect for your favorite past time. The key to any great work space is the countertop – choose from Stainless Steel, Butcher Block or Ebony Star Laminate.

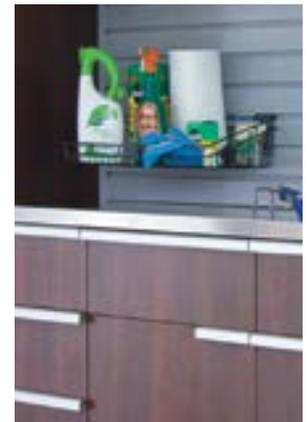

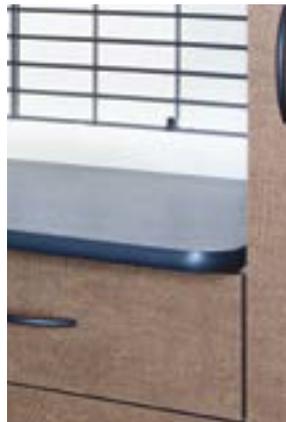

**Stainless Steel:** Stainless steel countertops (shown left and above) add a modern industrial feel to the garage. Stainless steel is non-porous and, therefore, does not stain. The durability of stainless steel ensures your countertops will withstand any amount of abuse and will remain beautiful. Stainless steel also blends harmoniously with many different colors and materials, making it a good fit for your own unique design.

**Ebony Star Laminate:** Affordable and easy to maintain, the Ebony Star countertop (shown below) is a smart option for any garage. With flecks of grey, white and black and extra thick, rounded-edge banding, this countertop coordinates with any workbench.

**Butcher Block:** Originally used in butcher shops for cutting and chopping meats, the butcher block has evolved into a beautiful yet practical multi-purpose work surface (shown above). Warm and naturally beautiful, butcher block countertops add character to your garage.

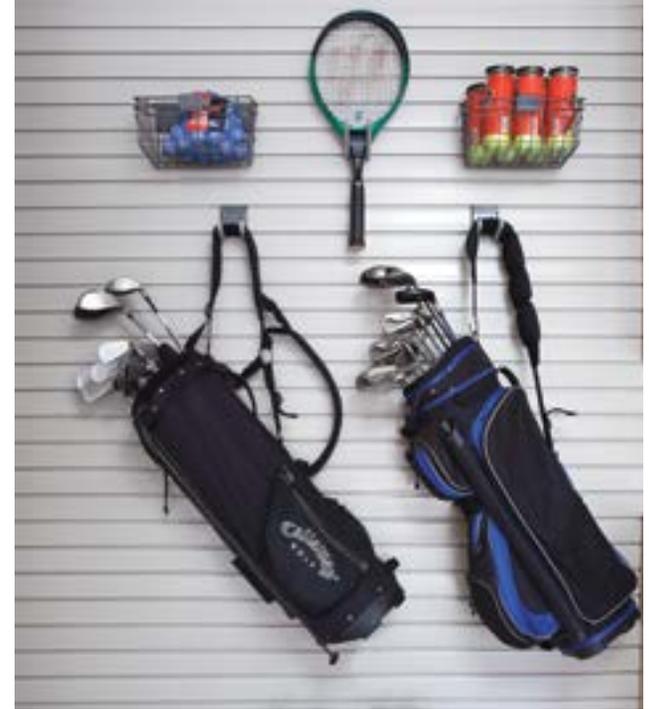

# STORAGE SYSTEMS

Garage storage has always been a problem. Our complete line of storage and organization systems provide the most effective solution. With overhead storage racks and two different wall system options, garage organization and storage has never been so simple.

**Overhead Storage Racks:** Our ceiling storage units have the highest weight capacities of any overhead racks on the market. Ceiling racks are perfect for storing seasonal items and less frequently used bulky items.

**FLEXIBLE FIT**

**Wall Storage Systems:** Keep the garage clean by hanging everything from power tools to bicycles on the wall. We offer two modular, wall-mounted organization products with interchangeable accessories: Slatwall and Gridwall.

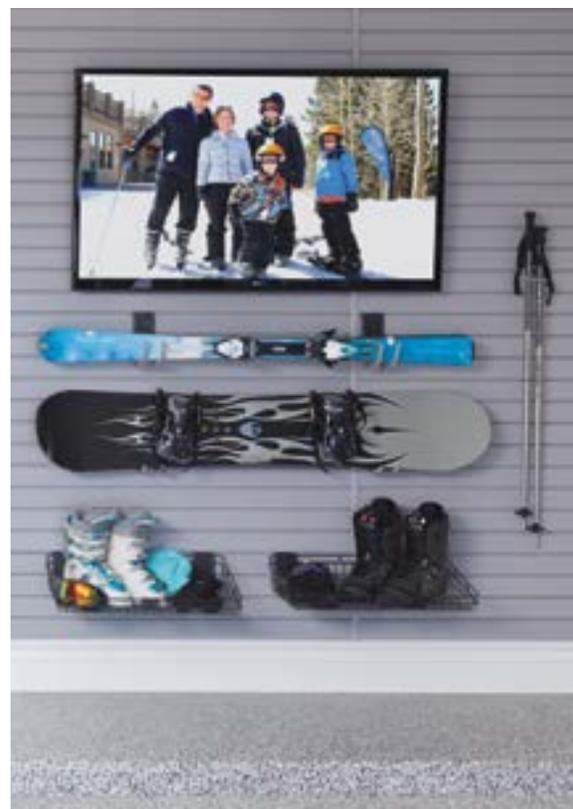

**Slatwall:** Durable PVC Slatwall panels (shown above and far right) are cut to fit your individual space. Impervious to water, slatwall will not chip, warp or flake. Used as a complete wall covering or as a complement to your existing home storage, slatwall allows a flexible layout that easily adapts to your changing storage needs. For full wall coverage, trim pieces provide finishing touches around edges, windows and doors.

**Gridwall:** Constructed of commercial grade steel, the gridwall system (shown right) is designed to last. Gridwall sections mount securely to the wall allowing you to maximize your storage needs in even the smallest spaces.

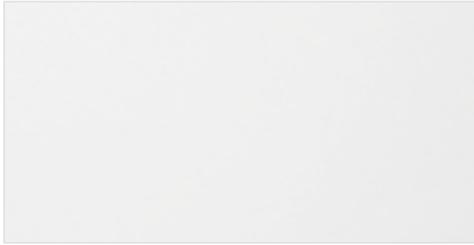

**Accessories:** Accessories simply snap onto the Slatwall or Gridwall panels without tools and can easily be rearranged as your storage needs change. We offer an extensive selection of accessories including durable hooks, shelves, tilt bins, wire baskets, tool holders, sport racks, recycling bins and more.
